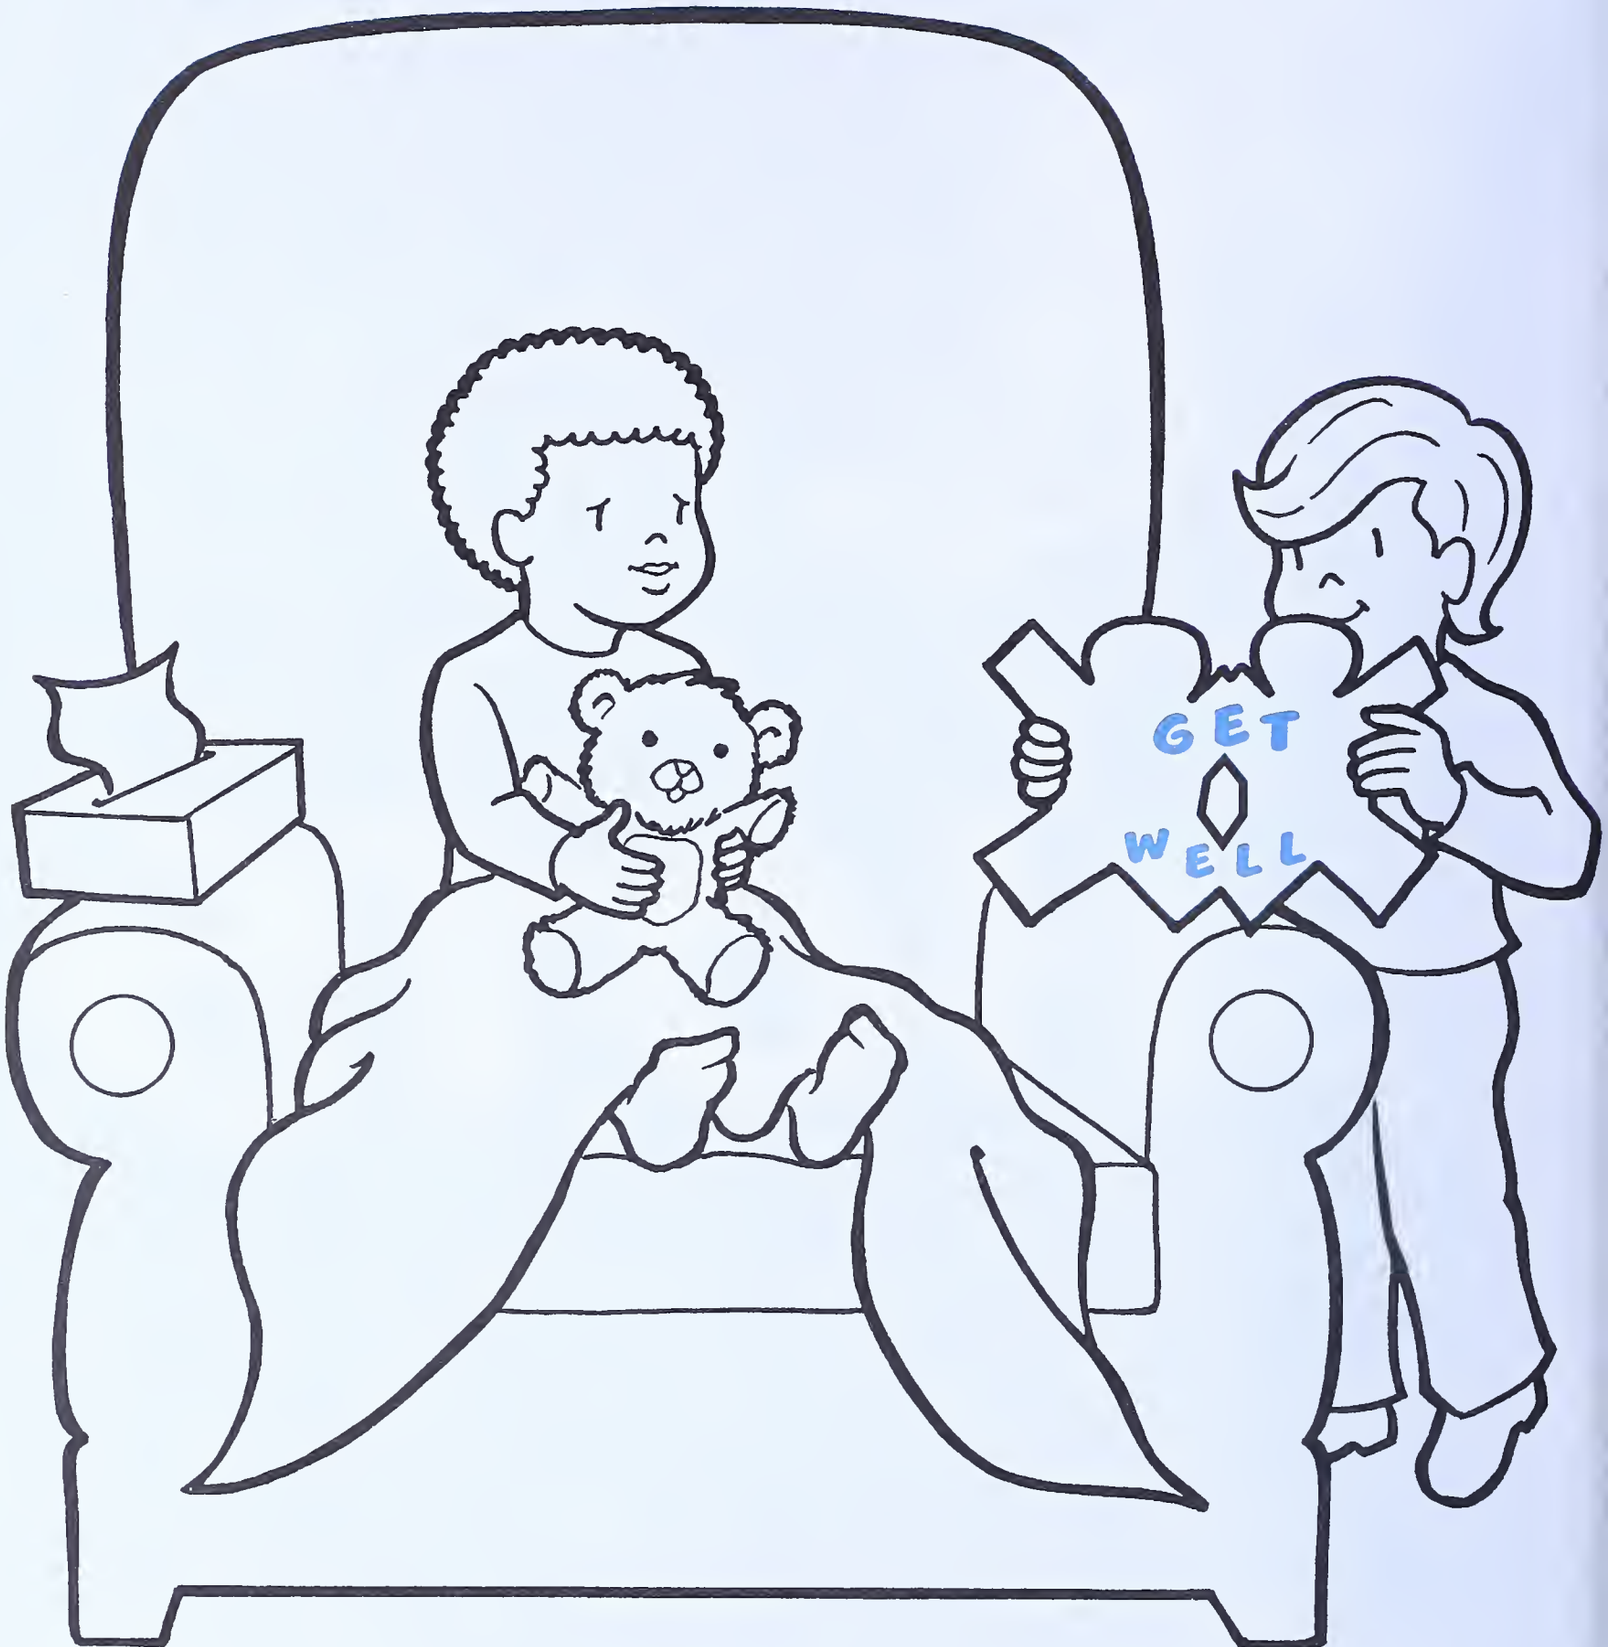
My Book about SHOTS

PENNSYLVANIA STATE LIBRARY
DOCUMENTS SECTION

BEING HEALTHY IS A LOT MORE FUN THAN BEING SICK.



To the parent:
This booklet can help your child understand the importance of getting shots. It does not take the place of a discussion about shots between you and your child's health-care provider.

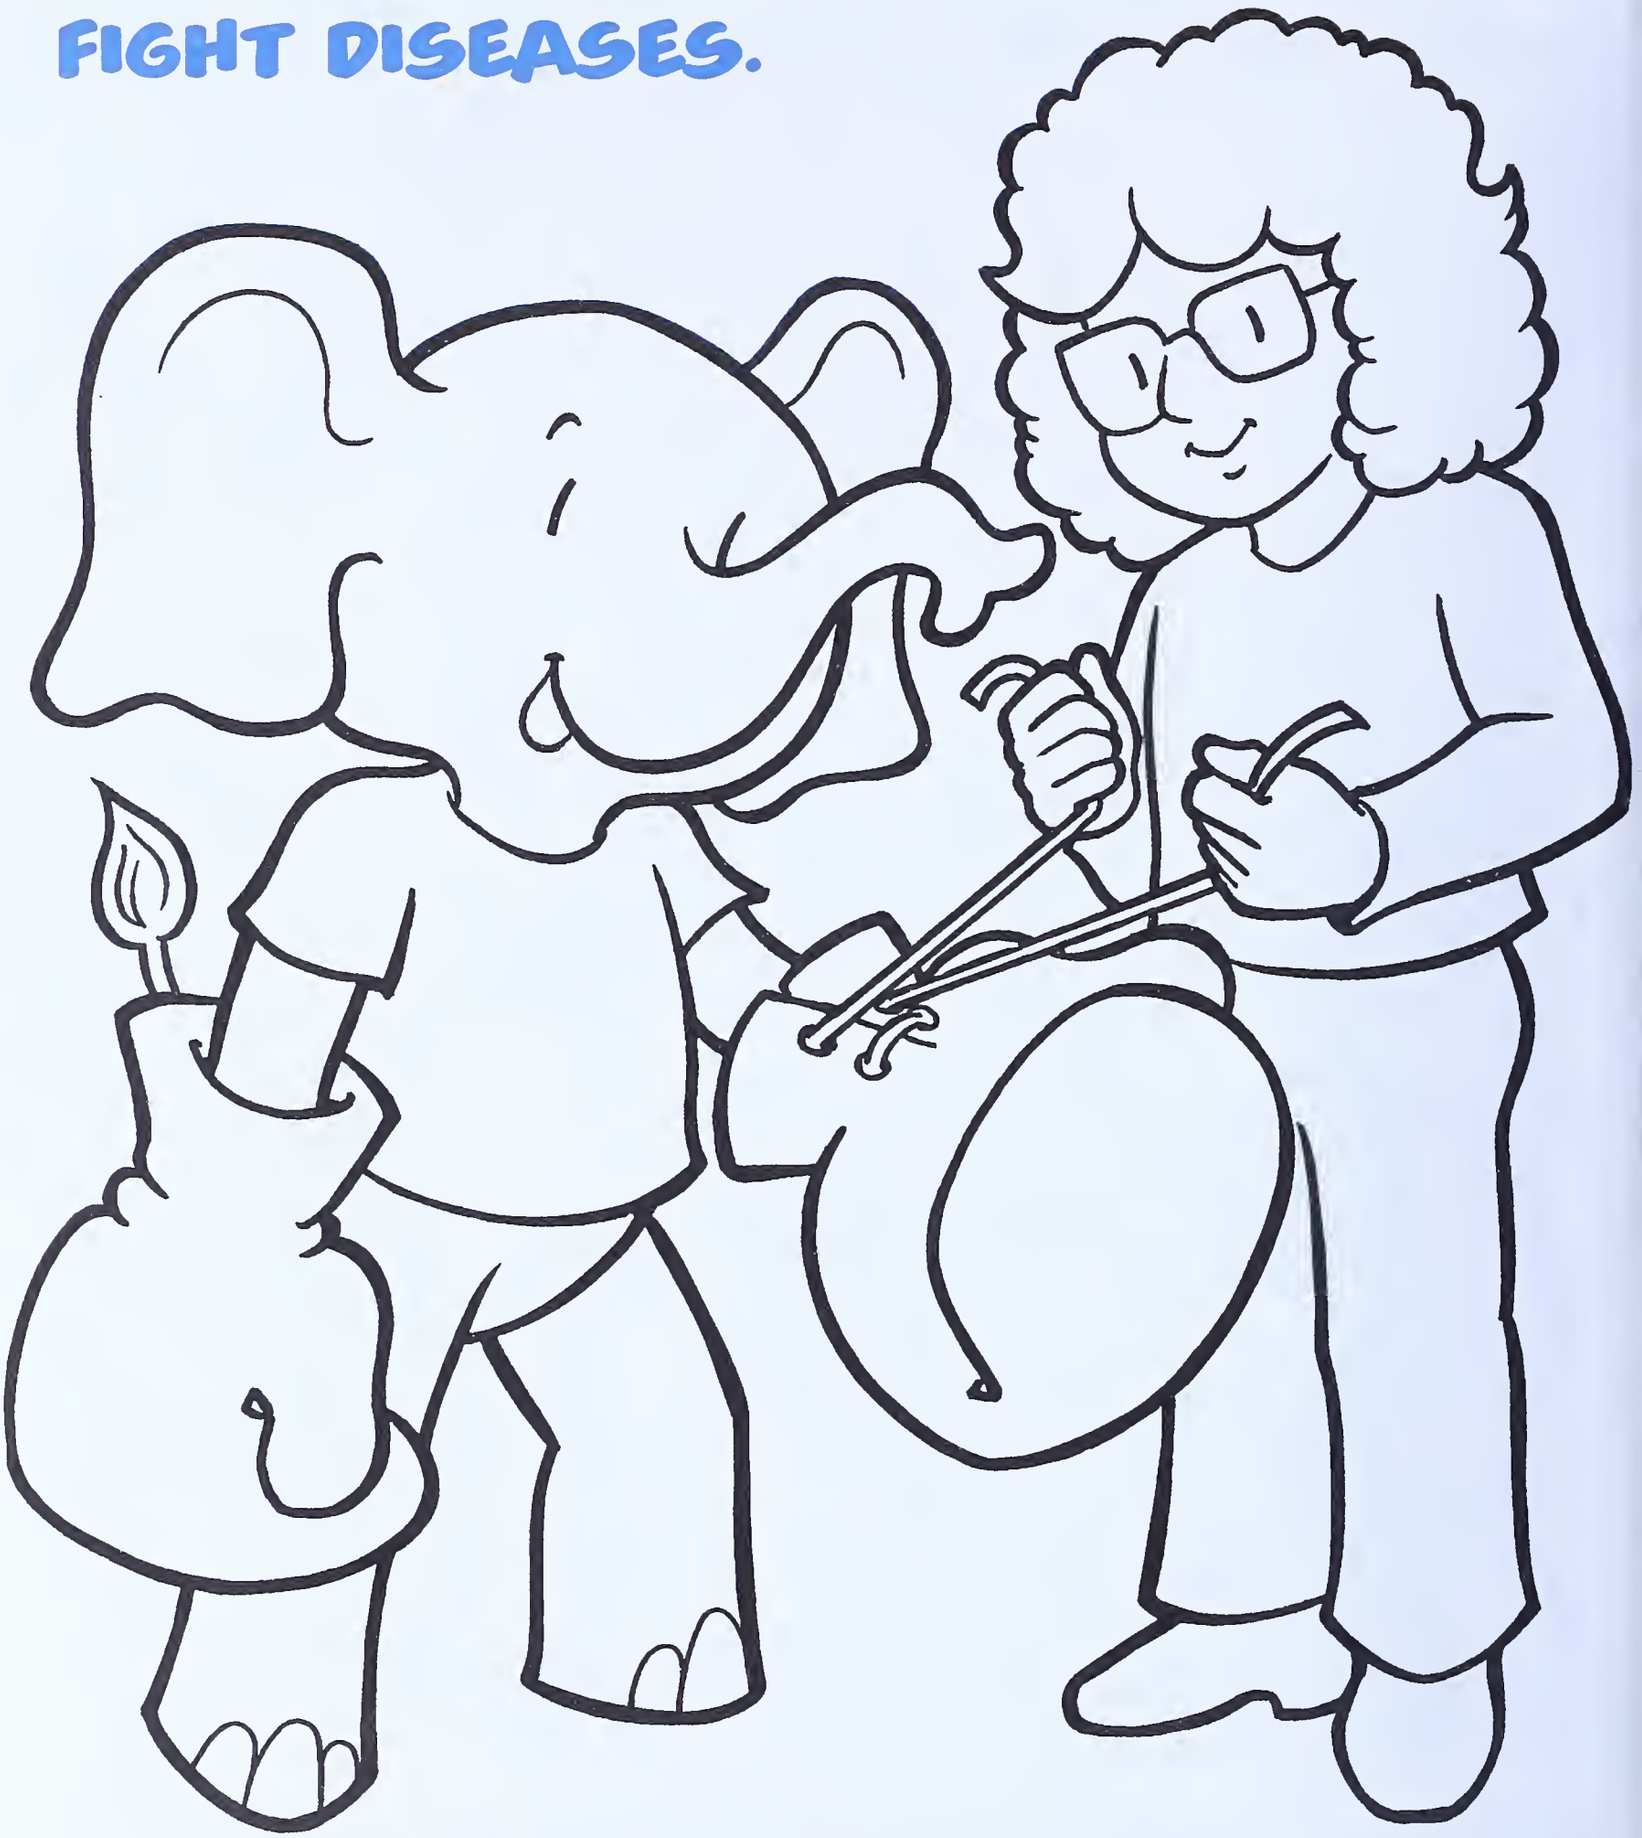
SHOTS HELP YOU STAY HEALTHY.

Most shots are given to babies. All kids need shots before they can go to child care or school.

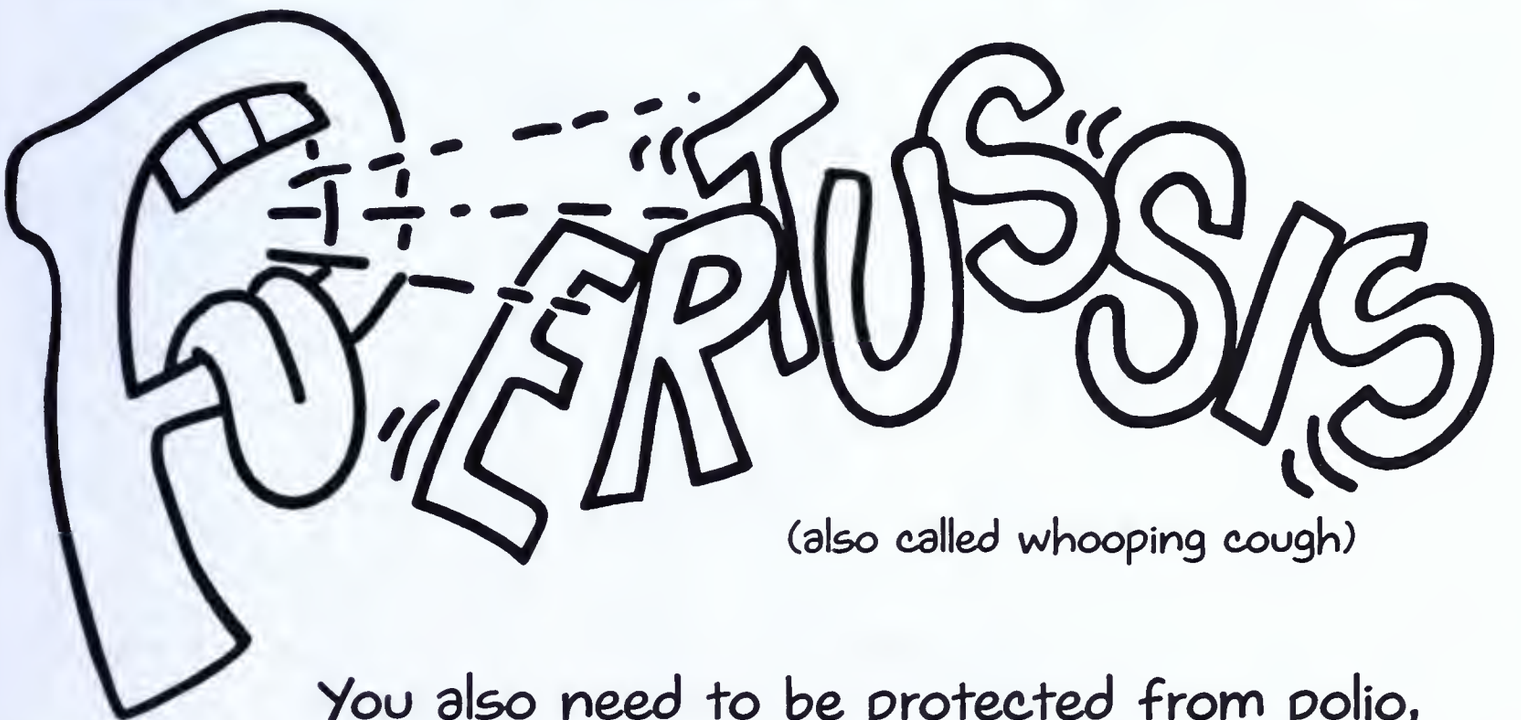
SHOTS HELP YOUR BODY FIGHT DISEASES.



Diseases can make you very sick.
Here are some diseases that shots
can protect you from:

MEASLES

MUMPS



PERTUSSIS

(also called whooping cough)

You also need to be protected from polio, rubella, diphtheria, tetanus, Hib disease, chickenpox and hepatitis B. These diseases have hard names. But getting protected from them is easy!

SOME SHOTS MAY HURT A LITTLE AT FIRST.

But they can help you stay healthy a long time -- even when you are a grownup.

Draw faces on the child and the adult.

EVERYONE NEEDS SHOTS.

Ask a parent to help you answer these questions.

1. Did you have shots when you were a baby?

   YES NO

2. Do you have a baby brother or sister who needs shots?

   YES NO

3. Did your parents get shots when they were kids?

   YES NO

4. When do you need to go for your next shot?

   _____

Soo --

SHOTS HELP KEEP YOU WELL.

Stay healthy and have fun!

Draw a picture of you and a friend having fun.
